EDUCATION

Pace University, Seidenberg School of CSIS

Master of Science in Computer Science, Applied AI Concentration

New York, NY

Expected 2028

University at Buffalo

Bachelor of Science in Computer Science

Buffalo, NY

May 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, PHP, Solidity, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, Flask, REST APIs, Scikit-learn, OpenCV

Tools & Platforms: Git/GitHub, Linux, VS Code, Jira, Airtable, Figma, MySQL, Postman

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming (OOP), Full-Stack Development, RESTful API Design, Database Design, Unit Testing & Debugging, Version Control, Software Development Life Cycle (SDLC)

Process & Collaboration: Agile/Scrum, Sprint Planning, Cross-Functional Collaboration, Technical Documentation, Code Review

EXPERIENCE

Freelance Web Developer

Mar 2024 – Jul 2024

Yours Truly Contracting

Yonkers, NY

- Designed, developed, and deployed a responsive full-stack website using HTML/CSS/JavaScript, improving user experience and increasing inquiries by 40% within 3 months.
- Built and debugged UI components and navigation flows optimized for non-technical users, reducing bounce rate by 25% through iterative user testing.
- Version-controlled all source code with Git/GitHub and organized 10+ client projects into a structured, maintainable content system.

Store Manager

Jun 2021 – Present

7 Days Gas and Food Mart

New Rochelle, NY

- Maintained operational processes and customer-facing workflows in a fast-paced environment, consistently adapting to changing priorities and needs.
- Demonstrated strong organizational skills and attention to detail through inventory management, transaction handling, and daily reporting.
- Provided consistent, high-quality support to a diverse customer base — building communication skills applicable to end-user enablement and onboarding.

RELEVANT PROJECTS

BookClub | *Scrum, Jira-style Workflows, Agile, Git* | Project Manager

Jan 2026 – May 2026

- Led a cross-functional team of 4 developers across multiple Agile sprints, managing sprint boards, backlog grooming, and task delegation in Jira.
- Maintained sprint velocity by identifying bottlenecks early and implementing process improvements throughout the software development life cycle (SDLC).
- Enforced version control best practices with Git and ensured all deliverables were code-reviewed, documented, and aligned with project scope.

YogaAI | *Python, Flask, ML, OpenCV* | Pose Correction System

Jan 2026 – May 2026

- Built an end-to-end full-stack application with a Flask REST API backend and Python ML pipeline, integrating real-time data from multiple sources into a unified feedback engine.
- Trained and evaluated a Random Forest classification model (98.51% accuracy) using object-oriented Python design, with unit testing to validate pose-detection accuracy.
- Documented system architecture and API endpoints, creating reference materials that supported team understanding of the platform.

Yodamart | *Solidity, Web3, JavaScript* | Blockchain Marketplace

Jan 2026 – May 2026

- Developed and deployed Solidity smart contracts (ERC-20/ERC-721) integrated with a React frontend, enabling a full-stack decentralized marketplace with real-time user interaction.
- Implemented secure state management, wallet authentication, and transaction workflows across a multi-component system, applying object-oriented design principles for scalability.

Personal Portfolio Website | *React, Vite, JavaScript, CSS*

Feb 2026 – Apr 2026

- Designed, built, and deployed a responsive full-stack production website with custom domain and DNS configuration, ensuring cross-device compatibility.
- Implemented dynamic, component-based UI rendering with version control via Git/GitHub, delivering a polished, maintainable user-facing experience.
